

## 「細胞と分子生理/上皮膜研究グループ」

### グループディナー賞

慶應義塾大学大学院医学研究科

余 盈君

I am very happy to be awarded the group dinner prize of the “Molecular Physiology/Membrane Transport” group in the Japanese Physiological Society. I entered the Keio University Graduate School of Medicine with an introduction from Prof T-C Hwang to Dr Sohma in April 2009. The CFTR electrophysiology was my first project in Keio. I learned the patch-clamp technique and have performed a series of molecular physiological/pharmacological experiments on CFTR channels including those for the awarded JPS paper. I also had an opportunity to learn something about the Monte Carlo channel gating simulation.

Finally please let me appreciate Drs Y Sohma, T-C Hwang, M Yasui and all other colleagues for their great helps and supports to me.

- 2001年6月 台湾 中台医護技術学院 看護士科 卒業
- 2006年8月 台湾 中央大学理学部 生命科学専攻 卒業  
台湾 陽明大学大学院修士課程, 同大実験助手等を経て,
- 2009年4月 慶應義塾大学大学院医学研究科 博士課程 入学
